Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

In view of the applicant's amendment/response filed February 02, 22003 in which it was established that the claimed of the water-soluble block copolymer has a linear array of the same individual structural units, linear poly(ethylene imine) block unit and a linear poly(N-propionyethylene imine) block unit and the process of preparing the water soluble block copolymer; which differs from Shen et al copolymer which has a random distribution of two types of individual units. Thus, the claims are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited to show the state of the art of preparing water soluble condensation products; Streit and Scherr.
